

FLOCARE CONTAINERS & REUSABLE BOTTLES

FLATTEN | CAP ON

Widely Recycled

The **Flocare containers**, used for decanting feeds and administration of water, are made from low density polyethylene. The **purple caps** can be left on when recycling as they are made from high density polyethylene and can also be disposed of with your household plastics. The **reusable bottles**, are made from polypropylene. Both the containers and reusable bottles are, therefore, **fully recyclable** and can be disposed of with your household plastics.

PACKAGING

Widely Recycled

Widely Recycled

The printed **blister packs, booklets, and cartons/boxes** used for the Flocare range are all **fully recyclable** and can be disposed of with your household paper waste. Moving the **Flocare Infinity pump boxes** from purple to brown boxes means they are now **fully recyclable** with your household cardboard.

Z-STANDS & GO-FRAMES

We are now able to clean and refurbish our **Z-stands and Go-Frames**, meaning we won't need to purchase any new ones for the remainder of 2019. Both Z-stands and Go-Frames are manufactured using polycarbonate plastic which, while being one of the better plastics, creates approximately 4.2kg of CO2 emissions per Z-stand.

OPTRI BOTTLES

FLATTEN | CAP ON

Widely Recycled

OpTri bottles are made from high density polyethylene and are **fully recyclable** and **reclaimable**: the waste plastic from the production process is reused and reintegrated into the manufacturing process. These can be disposed of with your household plastics.

ORAL NUTRITIONAL SUPPLEMENTS

FLATTEN | CAP ON

Widely Recycled

All of our 125ml and 200ml plastic bottles are made from high density polyethylene and are **fully recyclable**; they can be disposed of with your household plastics. The white lids on Nutilis Complete Drink Level 3 are made from low density polyethylene and can be disposed of with your household plastics as they are **fully recyclable**.

All lids and our range of plastic pots* – Calogen Extra Shots, Fortini Creamy Fruits, Nutilis Fruit Level 4 – are made from either low density polyethylene or polypropylene and are also fully recyclable. Lids can be left on when recycling.

GIVING SETS & FEEDING TUBES

Not Yet Recycled

Our giving sets and feeding tubes are manufactured using mixed plastics and are therefore not recyclable; these should be disposed of with your general waste.

RECYCLING SYMBOLS EXPLAINED

SYMBOL	POLYMER TYPE	RECYCLABLE
